To whom this concerns

We need to reconsider the location of the talked about gravel pit.

How would it help Blackfoot?

The location is way to close to the green belt and rivers area. The main reason

tourists come to this area is the beautiful nature and

animals we have here. The

run off would definitely affect

the river.

Exhibit
T-24

The dust, dirt, and noise makes it very hard to live near this gravel pit.

There are many other areas that would be more appropriate. There are several businesses in that area that would be damaged if the gravel pit was there.

The silica in the air alone is dangerous to people.

There are people living out in that area that suffers from allergies).

Please reconsider the location of this business.

Thank you

Sandy Wintubourne
